BIXBITE --- MEANING OF THE NAME

BixBite: The Red Emerald BixBite has only been found in the United States. Benitoite had claimed the title of rarest gem stone on earth until the Jewelers Association gave BixBite that honor in 2006.

As it is a rarity, BixBite is still unknown to many people.

BixBite, also known as red beryl or red emerald, is found only in the Wah Wah Mountains and the Thomas Mountains of Utah.

BixBite was named after Utah's Maynard Bixby, a mineral collector.

One estimate suggests that for every faceted BixBite gem, there are 150,000 diamonds, 12,000 emeralds, and 9,000 rubies.

PRIVATE PARTIES & EVENTS

Looking to celebrate a birthday, anniversary, baby shower, bridal shower or some special event? Ask your server for more details!

A Gift Certificate is a perfect gift for that special someone! \$25 ~ \$50 ~ \$100
